

TEXT-TO-SPEECH SERVICE

TEAM ID : PNT2022TMID54076

PROJECT NAME: PERSONAL ASSISTANCE FOR SENIORS WHO ARE SELF-RELIANT

- To create the "Text to speech" service navigate to the catalogue and search for "Text to speech" and click on it.
- You will be navigated to another page where you can click on create to create the service

The screenshot shows the IBM Watson Text to Speech service configuration page. On the left, a sidebar lists service details: Provider (IBM), Last updated (11/04/2022), Category (AI / Machine Learning), Compliance (EU Supported, HIPAA Enabled, IAM-enabled), Location (Sydney, Frankfurt, London, Tokyo, Washington DC, Dallas), and Related links (API docs, Docs, Terms). The main content area is titled "Select a pricing plan" and includes a note: "Displayed prices do not include tax. Monthly prices shown are for country or location: [United States](#)". Below this is a table with three plans: Lite, Standard, and Premium. The Lite plan is selected and marked as "Free". The Standard plan is priced at "\$0.02 USD/THOUSAND CHAR". The Premium plan is described as "Everything in Standard plus..." and includes features like "Usage and Training Data is Private + Stored in an Isolated Single Tenant Environment", "High Availability and Service Level Uptime Guarantee", "IBM Cloud Service Endpoints", "HIPAA - Washington DC Only", and "Custom Voice (Beta)". On the right, a "Summary" panel shows the service name "Text to Speech", location "Sydney", plan "Lite", and a "Free" status. It also includes a checkbox for "I have read and agree to the following license agreements:" with a "Terms" link, a "Creating..." status, and an "Add to estimate" button.

Plan	Features	Pricing
Lite	10,000 Characters per Month The Lite plan gets you started with 10,000 characters per month at no cost. When you upgrade to a paid plan, you will get access to Customization capabilities. Lite plan services are deleted after 30 days of inactivity.	Free
Standard	Standard Characters	\$0.02 USD/THOUSAND CHAR
Premium	Everything in Standard plus... Usage and Training Data is Private + Stored in an Isolated Single Tenant Environment High Availability and Service Level Uptime Guarantee IBM Cloud Service Endpoints HIPAA - Washington DC Only Custom Voice (Beta)	

The screenshot shows the "Getting started with Text to Speech" page. The left sidebar has a "Manage" section with "Getting started" selected, and other options like "Service credentials", "Plan", and "Connections". The main content area is titled "Getting started with Text to Speech" and includes a "Last Updated: 2021-02-02" timestamp. The text explains that the IBM Watson Text to Speech service converts written text to natural-sounding speech and provides a tutorial for getting started. It mentions that the tutorial is based on the cURL-based tutorial and provides examples of how to call the service's POST and GET /v1/synthesize methods. Below the text is a video player with a play button and the title "Get started with Watson Text to Speech". At the bottom, there is a "Before you begin" link.
